Sepehr Mirza Ali Mohammadi

Senior Software Engineer | Frontend & Technical Leadership | Fintech

Satarkhan, Tehran, Iran
+98 999 960-4166
sepehrinreallife@gmail.com

Professional Summary

Hands-on Senior Software Engineer with 8+ years of experience specializing in frontend architecture, cross-functional system design, and enterprise fintech. Proven track record of building financial platforms for Shahr Bank. Combines strong frontend leadership with backend architecture and infrastructure management to deliver robust, business-aligned solutions.

EXPERIENCE

Faash (Technology Subsidiary of Shahr Bank), Tehran — Senior Software Engineer — 2025 – Present

(Promoted from Software Engineer within five months based on technical delivery and expanded leadership scope)

- **Technical Leadership**: Lead a 4-person **frontend** sub-team within a 8-person unit. Manage task assignment, conduct rigorous code reviews, participate in hiring, and establish engineering conventions (Git/Husky).
- **Enterprise Fintech (SCF)**: Lead frontend architecture and workflow design for Shahr Bank's core Supply Chain Finance (SCF) and Barat systems. Actively shape product strategy and translate business logic for engineering teams.
- **Backend Architecture (IPG)**: Independently designed and built a custom Internet Payment Gateway (IPG) for enterprise bill payments using Python, FastAPI, and Oracle, featuring custom application-layer cryptography.
- **Infrastructure & System Design**: Manage production/staging deployments (Docker, Nginx, GitLab CI, Linux) and collaborate extensively with the .NET team on full-stack system design and bottleneck resolution.

Weblink, Tehran — Founder / Full-Stack Developer — 2020 – 2023

- Founded and led an 8-person engineering team focused on healthcare software.
- Architected and deployed a clinic queue management application (Next.js, PostgreSQL, Prisma), managing full-stack development, client relations, and production releases.

Health Tourism Development Center, Muscat(Oman) — Technical Consultant — 2019 – Present (Part-Time)

- Provide hands-on architectural review, system design consulting, and advanced troubleshooting for diverse software projects.

Novatixe, Tehran — Founder / Full-Stack Developer — 2018 – 2020

- Founded a 4-person engineering team, successfully architecting and delivering 6+ client projects over two years.

Independent / Freelance, Tehran — Software Developer — 2016 – 2018

- Began 8-year professional career building custom web applications (PHP, Laravel, WordPress).
